

The current local radio stations need to stop most of their chatter and the advertisement the I won't have bought XM radio so I could listen to music. They don't update their news and weather regularly and they only allow 5 minutes or less for the news and weather and if they give a traffic report at 0600 at 1000 they are saying the same info. Please leave our only hope to get current info along and if the local stations want to complete let them wake up and get with the public needs and not their own self serving ways.
